

MITOCHONDRIA

Layer 2/3 Serial EM Volume

LARGEST MITOCHONDRIUM IN VOLUME BY VOXELS

Astrocyte

Cell id 648518346349527319

Mito id 866030

all mitochondria in astrocyte 648518346349527319

ASTROCYTE

648518346349527319

- Contains the largest contiguous mitochondrion (mito id 866030) in the Layer 2/3 volume

4x4x40 nm³ x 64613, y 40665, z 1446

Share \$ 0 ? !

1EM x 2cell_segmentation_v185 x 3synapses x 4mitochondria x 5nuclei +

largest contiguous mitochondrion in the entire volume (astrocyte 648518346349527319)

ASTROCYTE

648518346349527319

- Also contains 9 highly branched mitochondria
(mito ids 866030, 1083380, 854433, 1083414,
1083667, 739489, 1077732, 961982, 1304222)

7.5 μm

OF THE TOP 100* MITO BY VOXELS MOST ARE IN ASTROCYTES

*for cells identified in the cell subtype table

LARGEST MITOCHONDRIUM IN A NEURON IN THE VOLUME

Excitatory pyramidal neuron

Cell id 648518346349537741

Mito id 2130887

cellid 648518346349527319
mitoid 2130887

10 μ m

largest contiguous mitochondrion in a neuron

cellid 648518346349527319
mitoid 2130887

10 μ m

largest contiguous mitochondrion in a neuron

5 μm

LARGE DENDRITIC MITOCHONDRION

Excitatory pyramidal apical dendrite

Cell id 648518346349537555

Mito ids 2703814 and 2974242

cellid 648518346349537555

5 μm

two large mitochondria in a neurite (soma not in volume)

cellid 648518346349537555

all mitochondria in this part of the neurite (soma not in volume)

ANOTHER LARGE DENDRITIC MITOCHONDRIUM

Excitatory pyramidal neuron

Cell id 648518346349537611

Mito id 964772

cellid 648518346349537611
mitoid 964772

7.5 μm

another large contiguous mitochondrion in a neuron

cellid 648518346349537611
mitoid 964772

another large contiguous mitochondrion in a neuron

LARGEST MITOCHONDRIUM IN AN OPC GLIAL CELL

Oligodendrocyte Precursor Cell (OPC)

Cell id 648518346349525545

Mito id 2187341

largest mitochondrion by voxels in an OPC glial cell (648518346349525545)

THE HIGHEST NUMBER OF MITOCHONDRION IN A CELL

Inhibitory basket neuron

Cell id 648518346349539215

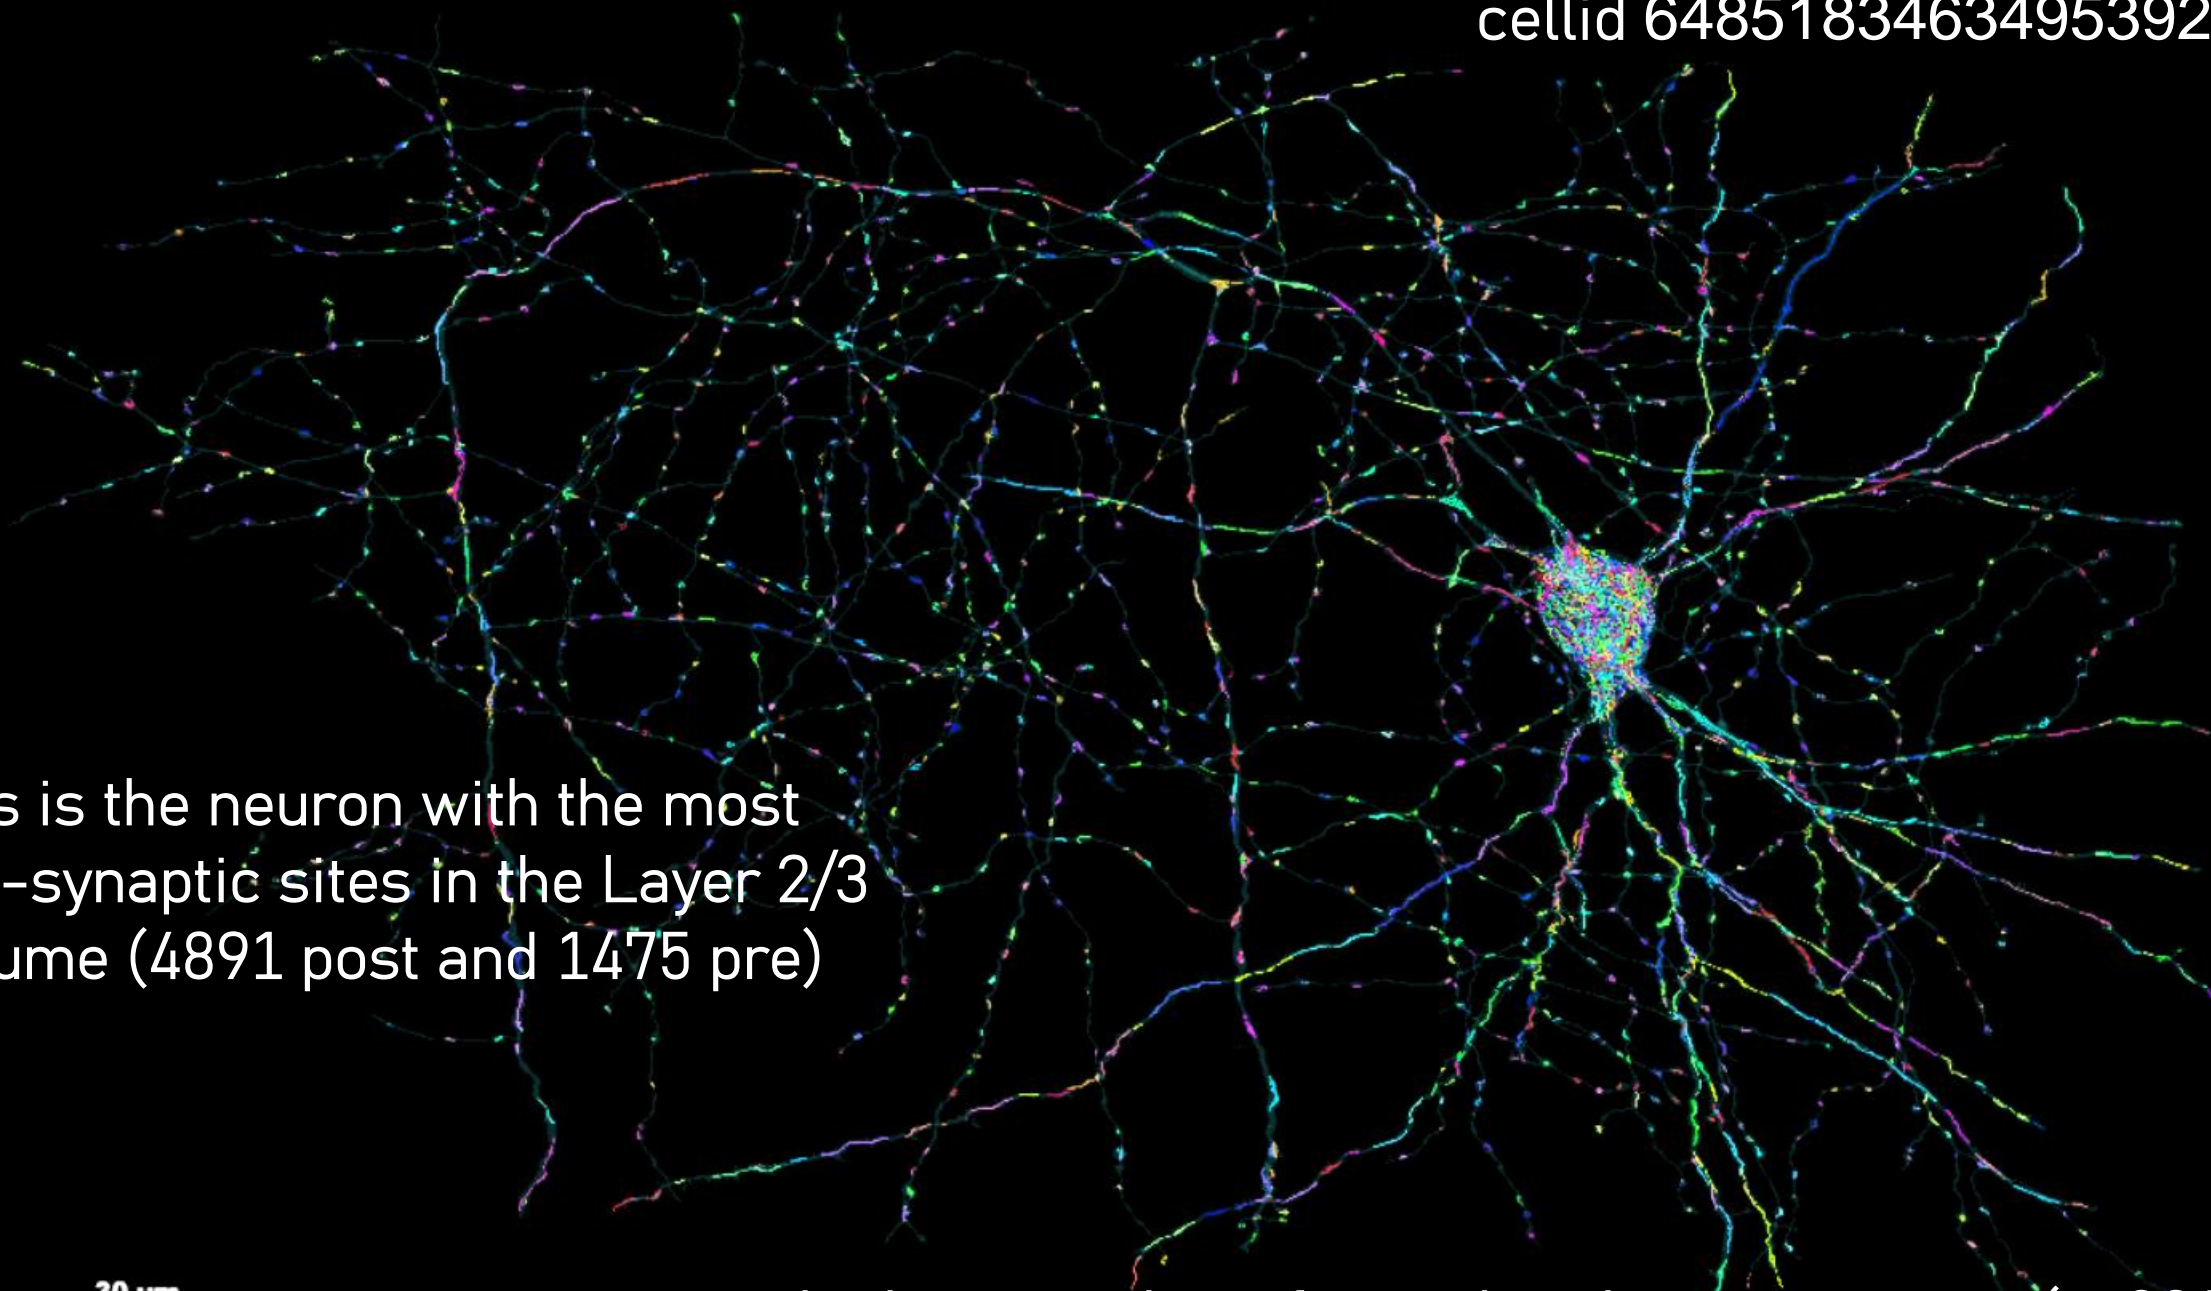

Mitochondria count $n = 3213$

cellid 648518346349539215

This is the neuron with the most
pre-synaptic sites in the Layer 2/3
volume (4891 post and 1475 pre)

30 μm

highest number of mitochondria in a neuron (n=3213)

longer mito length in dendrites

cellid 648518346349539215

smaller mito size in axons

7.5 μ m

A fluorescence microscopy image of a neuron. The cell body (soma) is centrally located and filled with a dense, multi-colored network of mitochondria. Numerous long, thin processes (dendrites and axons) extend from the soma. These processes contain smaller, more discrete, multi-colored mitochondrial segments. The background is black. A white scale bar in the bottom left corner indicates 7.5 μm. Text labels are overlaid on the image: 'longer mito length in dendrites' at the top left, 'cellid 648518346349539215' at the top right, and 'smaller mito size in axons' in the center-left area.

A HIGH NUMBER OF MITOCHONDRIUM IN A CELL

Astrocyte

Cell id 648518346349536888

Mitochondria count $n = 3173$

cellid 648518346349536888

15 μm

highest number of mitochondria in an astrocyte (n=3173)

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Inhibitory basket neuron

Cell id 648518346349528994

Mitochondria count $n = 2448$

Cellid 648518346349528994

20 μ m

mito n=2448

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Astrocyte

Cell id 648518346349525715

Mitochondria count $n = 2133$

Cellid 648518346349525715

15 μm

mito n=2133

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Inhibitory basket neuron

Cell id 648518346349538791

Mitochondria count $n = 2114$

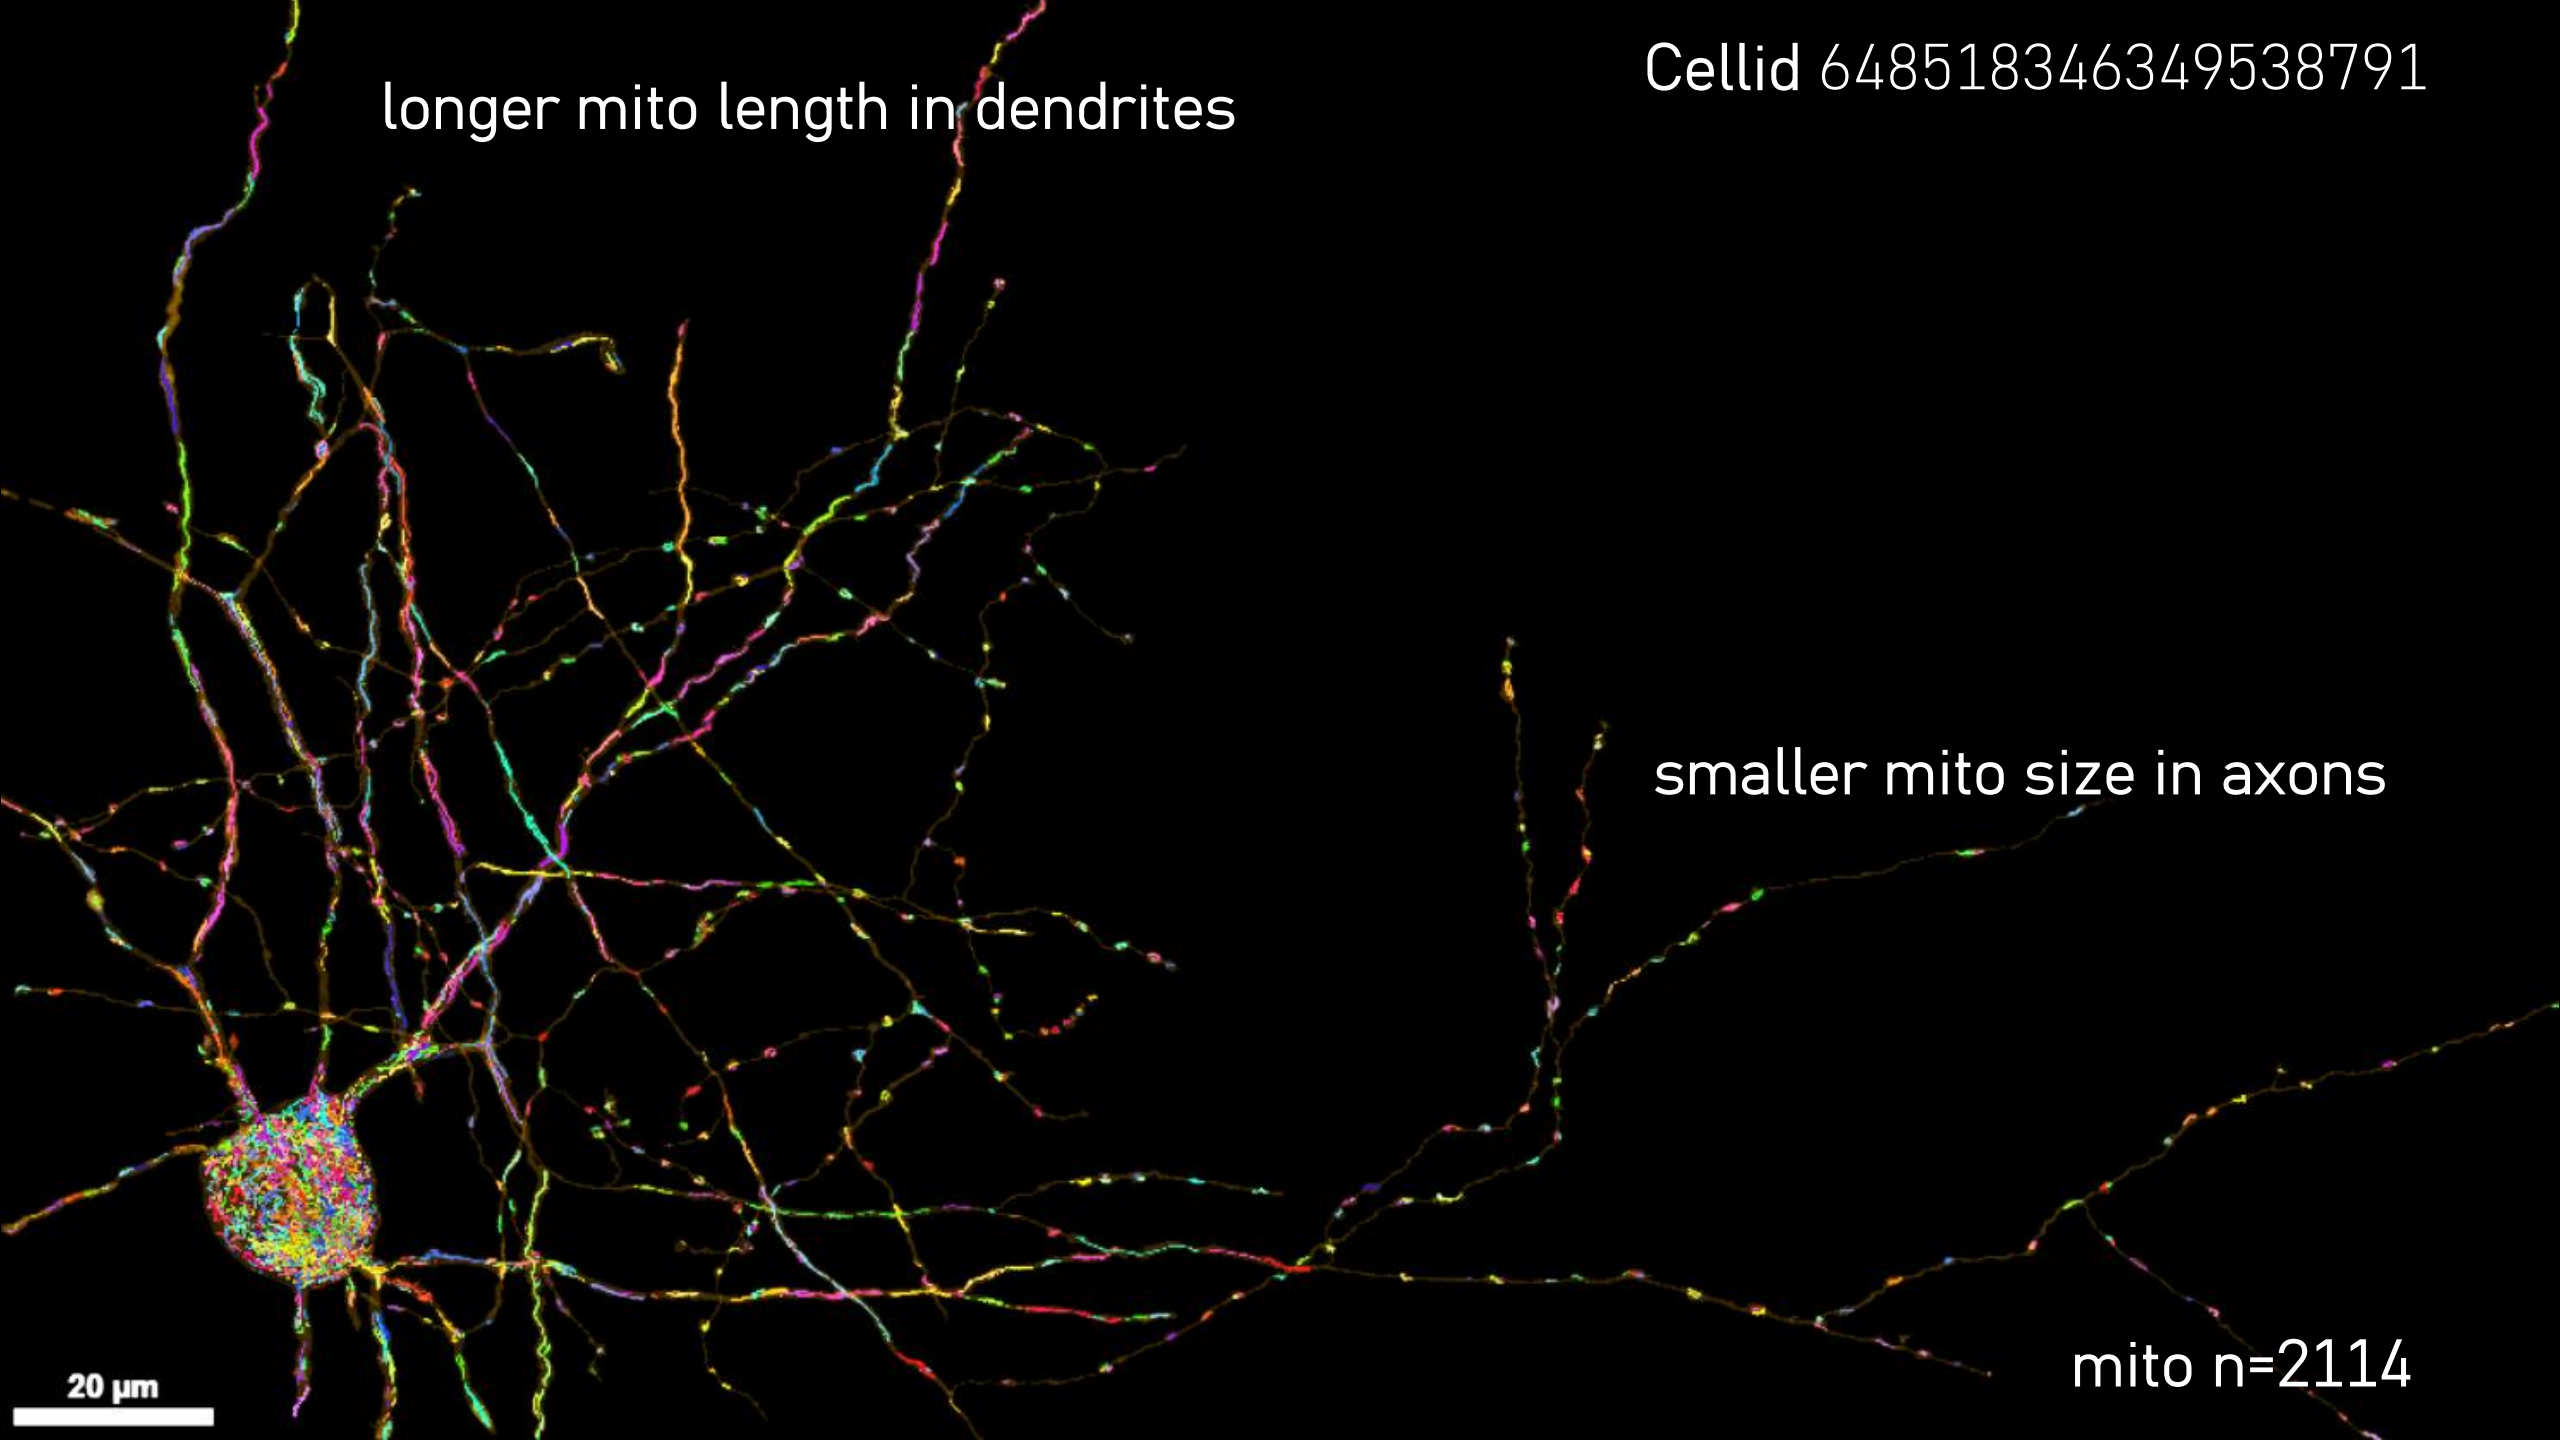

Cellid 648518346349538791

longer mito length in dendrites

smaller mito size in axons

20 μ m

mito n=2114

7.5 μm

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Inhibitory neuron of unknown type

Cell id 648518346349517783

Mitochondria count $n = 1877$

Cellid 648518346349517783

20 μm

mito n=1877

7.5 μm

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Inhibitory basket neuron

Cell id 648518346349539846

Mitochondria count $n = 1863$

Cellid 648518346349539846

20 μm

mito n=1863

A HIGH NUMBER OF MITOCHONDRIUM IN A CELL

Inhibitory neurogliaform interneuron

Cell id 648518346349538789

Mitochondria count $n = 1356$

Cellid 648518346349538789

15 μ m

mito n=1356

A HIGH NUMBER OF MITOCHONDRIUM IN A CELL

Inhibitory neuron of unknown type

Cell id 648518346349536849

Mitochondria count $n = 1168$

Cellid 648518346349536849

20 μm

mito n=1168

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Inhibitory Chandelier neuron

Cell id 648518346349538638

Mitochondria count $n = 1114$

Cellid 648518346349538638

20 μm

mito n=1168

neuronal primary cilia

neuronal primary cilia

500 nm

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Inhibitory Martinotti neuron

Cell id 648518346349538179

Mitochondria count $n = 1083$

Cellid 648518346349538179

20 μm

mito n=1083

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Excitatory pyramidal neuron

Cell id 648518346349538440

Mitochondria count $n = 969$

Cellid 648518346349538440

This is the neuron with the most
synapses in the Layer 2/3 volume
(5369 post and 106 pre)

20 μm

mito n=969

7.5 μm

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Excitatory pyramidal neuron

Cell id 648518346349539853

Mitochondria count $n = 945$

Cellid 648518346349539853

20 μm

mito n=945

A HIGH NUMBER OF MITOCHONDRION IN A CELL

Excitatory pyramidal neuron

Cell id 648518346349539900

Mitochondria count $n = 902$

Cellid 648518346349539900

20 μm

mito n=902
